RA Scouts Receive Awards

Eleven RA Scouts from RA Scout Troop 37 received 53 awards during presentation ceremonies on Wednesday, May 23, at the Elba First Baptist Church.

John Collier received First Aid and Swimming Skill Awards and First Aid Merit Badge. Tommy Jernigan, First Aid, Camping and Swimming Skill Awards and First Aid Merit Badge. Claude Collier, First Aid and Swimming Skill Awards and First Aid Merit Badge. Will Martin, Swimming Skill Award and First Aid Merit Badge. Gary Wise, First Aid, Camping and Swimming Skill Awards and First Aid Merit Badge. Keith Housh, First Aid and Swimming Skill Awards and First Aid Merit Badge. Stephen Bullard, First Aid, Camping and Swimming Skill Awards and First Aid Merit Badge. Clive Collier, Swimming, Environment and Family Living Skill Awards and First Aid Merit Badge. Keith Housh, First Aid and Swimming Skill Awards and First Aid Merit Badge.

Local Youngster Brings In Big Bream

Phil Hayes won fishing last Wednesday afternoon at Hood Lake, below Samson, and this is what he came home with. He caught seven of these big-eyes, but "one was too small," so he didn't keep it. The seven fish weighed 7 1/2 lbs. Phil used crickets and a pole.

"Those are the biggest fish I ever caught," he exclaimed, "and my daddy's going to have them mounted."

His daddy went along, too, but "my daddy didn't catch any," said Phil. Phil is the 11-year-old son of Mr. and Mrs. Charles P. Hayes, III.

Crime Court Calendar Named

The fall term and judges of the 12th Judicial Crime Court for Pike and Coffee Counties are as follows:

TROY-JUDGE GREEN: Grand Jury - Monday, June 25, 1973; Arraignment of Criminal Cases - Wednesday, July 25, 1973; Non-Jury Criminal - Wednesday, October 10, 1973.

TROY-JUDGE PAUL: Supplemental Arraignment of Criminal Cases - Friday, September 14, 1973; Jury Criminal - Monday, September 17, 1973; Non-Jury Criminal - Tuesday, October 10, 1973.

ELBA-JUDGE PAUL: Grand Jury - Thursday, June 28, 1973; Arraignment of Criminal Cases - Friday, July 27, 1973; Non-Jury Criminal - Tuesday, October 9, 1973.

JUDGE GREEN: Grand Jury - Monday, July 9, 1973; Supplemental Arraignment of Criminal Cases - Friday, September 14, 1973; Jury Criminal - Monday, September 17, 1973; Non-Jury Criminal - Tuesday, October 10, 1973.

ELBA-JUDGE PAUL: Arraignment of Criminal Cases - Thursday, July 26, 1973; Non-Jury Criminal - Thursday, October 11, 1973.

Vacation Bible School will be held at the New Haven Baptist Church from June 4th through June 8th. Preparation night is June 1st at 6:30.

The bus will run to pick up children interested in attending the bible school activities.

George Collier, president of Dorsey Trailers Inc., Elba, has been re-elected a member of the board of directors of the Alabama Trucking Association. This was the second year to have come in recent weeks for the Elba civic leader as he was most recently elected president of the Truck-Trailer Manufacturers Association.

T. K. Dorsey, General Transportation Services, Elba, who is a past president of the Association, also is a member of the board of directors.

Persons graduating representing rescue squads at Enterprise, Samson, Brantley, Elba, Daleville, Geneva, Opp, and Ozark police. They were: Wayne Blackmon, Charles Messick, John West, David Mount, Donna Carnes, Annette Mount, Terry Pryor, Ricky Carnes, and John O. West, Brantley, George C. Windham, Comer R. Henderson, Howard Morgan, William Driggers, and James Spurlin, Elba.

Classes will meet on Mondays and Wednesdays from 5:30 to 6:45 p.m. from June 13 through August 24. Students completing this course will earn three quarter-hour college credits.

Registration for night classes is scheduled from 6 to 8 p.m. June 11.

Public Library Has New Books

The Elba Public Library has received 15 new books from Cross Trails Regional Library, for people who don't see well.

Also, two new books on the 1/4 inch bold type. At present the library has the Western and Romance series, and an inspirational series will be in stock.

Mrs. Edna Dowling, librarian, also says she is preparing for the summer story hour. Times will be released at a later date. There are approximately 80 new books for young readers in the library.

RESCUE REPORT

The Elba Rescue Squad assisted at 2 accidents during the week of May 22 - 29, and performed 13 transfers from homes to hospital, and from one hospital to another.

FIRE REPORT

Elba enjoyed another week, May 22 - 29, with no fires.

ELBA ETCHES

Snakes caught in steel trap intended for rats.

Kids enjoying swimming in city pool.

Heavy rains exposing culvert across dirt road.

Beginner Band students proud of new instruments.

A momentous step was taken when the Commission adopted a partial unit system.

Mullins continued. However, I personally prefer a unit system being introduced in this session of the Legislature by Rep. Douglas Easters and Sen. L. L. DeLozier.

Mullins went on to say that he wished the best for Coffee County as "I have tremendous faith and confidence in its progress."

The county engineer's resignation is effective June 15 when he will become associated with private industry in Ozark.

Auburn University expects to award approximately 1,327 degrees at commencement exercises in Memorial Coliseum on June 5.

The degrees to be awarded include 19 doctorates, 2 specialists, 126 masters and 1,180 bachelors.

Many of the graduates completed the requirements prior to spring quarter and are presently employed or attending senior institutions. Their degrees and certificates will be presented in Absentia. Those receiving Associate in Arts Degrees in Absentia are James Andrew Besdole, New Brock; and Donald J. Smith, Kinistone.

Joint commissioning exercises are scheduled for seniors in advanced military programs at 9:30 a. m. in Langdon Hall. Candidates for the degree from this area are: Elba, Mary Sue Griffin, M. Ed. Bruce Daniels, B.E.; Ray Ellis Donaldson, John Richard Mixon, Janice Virginia Windham Smith and Donna Karen Windham, B.S.

ba High School.

Ronnie is the son of Mr. and Mrs. Roland Powell of Elba. This award is given each year to the Senior athlete who has excelled in all sports, a student with a good attitude toward his fellowman, ranking high in academic achievements, and excelling in leadership ability.

The 1972-73 Donald Bowdoin Memorial Award was presented to Ronnie Powell on behalf of Mr. and Mrs. Cecil Bowdoin, by L. W. Foley, Principal, Elba High School.

POOR ORIGINAL

Facts About Beef Prices

The 15,188 members of the Alabama Cattlemen's Association have become increasingly alarmed and concerned that the beef industry is being squeezed out of business. They deplore the threat of boycotts and meatless days throughout the nation by people who have no earthly idea what the increased costs, time, and problems are in producing livestock for the market.

Cattlemen point out that the cost of everything has risen and that beef prices are in line with all other goods and services. They are concerned that their product—BEEF—has been singled out as the main cause of inflation by politicians and housewives. They deplore the threat of boycotts and meatless days throughout the nation by people who have no earthly idea what the increased costs, time, and problems are in producing livestock for the market.

Alabama cattlemen pointed out that the threat of boycotts and meatless days will actually short change the consumer by ultimately resulting in reduced meat supplies and higher prices. Any move such as boycotts and meatless days would be an economic signal to the cattlemen that consumer demand is diminishing and therefore cattlemen would be reluctant to increase their beef herds.

The ISSUE today with reference to the housewives boycott of meat is the fact that beef has been the cheap to long. Now that beef has reached the point that cattlemen and farmers can realize a reasonable return on their labor and investment, the housewife is concerned.

After 20 years of struggling to make the beef cattle industry profitable the cattlemen is now catching up with the rest of the economy whose wages and prices have been skyrocketing for the past several years.

Cattlemen agree that beef prices have risen sharply during the past several months and they insist that present beef prices are not out of line.

Present meat prices are not out of line by any measurements with the level of wage rates, salaries, personal income, cost of living, or prices of most consumer goods; and even the rather recent increases in meat prices fall short of matching the steady and consistent increases of all other items.

Alabama cattlemen state that while beef prices are up, an hour's wage still buys more than twice as much beef as in 1950. The Alabama housewife is spending about 15% of her disposable income for food, which is the lowest in the history of our country. In 1960 she spent approximately 20% of her disposable income for food.

Expanding demand and high incomes are part of the reason for rising beef prices. More people with more money to spend are eating more beef today than ever before.

Even though cattlemen have doubled production in the past 20 years, cattle producers can hardly produce enough to keep up with their remarkable increase in demand.

Alabama cattlemen point out that they do not set the prices. Practically all cattle are sold at auction with buyers bidding what the traffic will bear, and cattlemen having to take what the packer is willing to pay. The final price for meat is set at the retail level.

They also point out that there is no quick way to produce a T-bone steak. Actually it takes approximately two years to produce the steak or roasts that housewives will have for dinner this week.

Alabama cattle leaders state that the cattle numbers are on the increase and that cattlemen are beginning to cull their herds and will be selling more cattle this Spring and Summer.

Alabama officials predict live cattle prices will level off and this should result in reduced prices at the retail level.

Cattle leaders also oppose any effort to place price controls on raw agricultural products. They believe that controls on beef prices would be self defeating because controls on meat do not decrease demand or increase supply.

The Pastor's Corner

REV EDWIN R. SELLS

I heard someone say the other day, "Spring has just got to be the nicest season of the year." I am rather inclined to agree with them. It is just wonderful to see the earth come alive with all the beauty that it has stored up through the long winter months. There is something about the freshness of nature, but how much of its real beauty we are able to see. To go fishing in the spring-time is the chance to wash one's soul in the pure air, with the

rush of the creek or river and the shimmer of the sun on the blue water. It seems to bring meekness and inspiration from the beauty of nature, charity toward the tuckermakers, patting a flower of the field, and toward the fish and a mockery of the ego. And it surely is a discipline in the equality of men—for all men are equal before the fish. It does one good to be in the out-of-doors and give his mind and body a minute to relax.

Despite your score, you can enjoy and appreciate God's creation on the golf course. A minister tells the story of having a young minister who played golf. The boy said, "Did you ever see the queen on her throne? The preacher said that he had not, so the boy bent over and picked up the flower in just the manner to reveal his story. Finally he turned the flower around and you could see a

throne and a queen with a crown above her head. The minister thought how alike it was with Jesus. Jesus touched the robe, pointed to the birds in the air, pointed to the flowers of the field, and toward the fish and a mockery of the ego. And it surely is a discipline in the equality of men—for all men are equal before the fish. It does one good to be in the out-of-doors and give his mind and body a minute to relax.

Not too long ago the United States was the world's leading oil exporter. But today, with only six percent of the world's population, we consume almost a third of all the energy used in the world. At the present time we have to buy about 25 percent of the crude oil requirements from foreign countries, and unless new domestic oil sources are tapped

soon, by 1985 the United States will be importing up to 85 percent of our oil needs.

Even with the President's action the nation still faces a serious crisis that threatens higher fuel prices, more shortages and perhaps some form of gas rationing for millions of Americans.

BRAINSTORMS

With Ferrin Cox

This is the time of the year for the brain fishermen and Elba is blessed with plenty of them, including this writer. Years ago I did a lot of fishing but after getting into the newspaper business, there just wasn't time for fishing I thought. However, this Spring I combined my natural desire to fish and a desire to try fly fishing, and away I went "hunting a brain bed". Some of my so-called friends have said that once a person is hooked on fly fishing, his work goes lacking but not his fishing. Well, I have too many bills to pay so I just fish sometimes... but ain't it fun!

Several Elba fishermen have offered to teach me to fly fish but I feel the lot of Jake Morrow to be "the first". He concentrated so much on teaching me that I caught more fish than he did on the first trip, but he later made up for that. The two of us have a trip to Florida planned this week if the weather will settle just a little. Tommy Thomason, my neighbor, has been fishing at the Coffee County Lake every night and I have been there and he keeps promising that he is going to show me how to "really catch the fish" but as of this writing we haven't gotten together. I have been hearing some grumbling about some plans of the Elba school board. They reportedly have announced a plan to spend \$25,000 to remodel part of the old vocational building for a superintendent's office. The complaints we are hearing are that the money would be better spent on air conditioning equipment for the school rooms, where the students and teachers spend their day. I don't know any more than this about the matter but will try to find out the details.

A graduate of Auburn University, Mr. DeVane has been promoted to the position of General Sales Manager of Dorsey Trailers, it was announced by George L. Collier, President of the transportation equipment manufacturing company. "DeVane has full responsibility for marketing Dorsey products," Collier said.

Since early 1970 DeVane has been Dorsey's Director of Distributor Sales in which position he supervised seven Regional Managers, servicing the company's nationwide network of approximately 125 franchised distributors.

In announcing the promotion Collier cited the fact that the company sales reached an all-time high in 1972 and that distributors were responsible for a substantial portion of the gain. "Volume in Dorsey's Sales Department nearly doubled in 1971 and 1972 and the present pace indicates another 20% increase this year," the President said.

In his new position DeVane will also direct the Company's factory sales offices and the Executive Account Managers, servicing national fleet accounts. He succeeds Frank A. Mulara who resigned in May as Vice President of Sales.

"Volume in Dorsey's Sales Department nearly doubled in 1971 and 1972 and the present pace indicates another 20% increase this year," the President said.

In his new position DeVane will also direct the Company's factory sales offices and the Executive Account Managers, servicing national fleet accounts. He succeeds Frank A. Mulara who resigned in May as Vice President of Sales.

A graduate of Auburn University, Mr. DeVane has been promoted to the position of General Sales Manager of Dorsey Trailers, it was announced by George L. Collier, President of the transportation equipment manufacturing company. "DeVane has full responsibility for marketing Dorsey products," Collier said.

Since early 1970 DeVane has been Dorsey's Director of Distributor Sales in which position he supervised seven Regional Managers, servicing the company's nationwide network of approximately 125 franchised distributors.

In announcing the promotion Collier cited the fact that the company sales reached an all-time high in 1972 and that distributors were responsible for a substantial portion of the gain. "Volume in Dorsey's Sales Department nearly doubled in 1971 and 1972 and the present pace indicates another 20% increase this year," the President said.

How about the new revolution in the line of golf equipment, the graphite shaft? You don't hear many conversations among golfers anywhere these days that aren't at least partly about the new shaft. Does it work? If so, will it work for the average golfer as well as the duffer? Is it lighter, heavier, or the same weight as the steel shaft? Is it cheaper or more expensive? Are the pros using it? All these questions come up at some time or another in pro shops everywhere.

Answering first questions first, the graphite shaft definitely adds distance to the distance clubs, those being woods and long irons. I swung one on the practice tee recently, and was very impressed with the feel of the club. It seems that the feel (or coordination) between the hands and the clubhead is the same as with the steel shaft, even though the club seems to flex more on the downward arc, which is the main factor as far as distance is concerned. Putting the answer to the distance

question more simply, yes, the ball flies further with the graphite shaft.

Would the average golfer benefit from the new shaft? The opinion here is definitely not. The average golfer is not usually a distance player, and control is usually a big problem he encounters. The added flex may add distance to his drives, but may also cause him to sprain the ball.

Now the question may arise: Isn't a regular shaft the same, no matter what the material? One swing with the graphite club proves that false. It is supposed to be but it's not, which is used to check shafts, does not use the heavy jerky method of movement that the average golfer does, and doesn't bend the club as a golf swing does.

Weight difference in the graphite and conventional steel is not a big one. The overall weight of a standard driver is not changed by a graphite shaft. It may feel heavier

or lighter and even look it, but it's not on the scales.

Now for the big difference in graphite and steel, the price. The cost to make a club with a graphite shaft is roughly five times greater than that of making a steel shaft club. The pros on the tour are using them but mostly in drivers only. A graphite driver costs approximately eight five dollars, and its easy to figure why more pros don't use them.

Now I hope this information hasn't been passed along in too complicated a manner for the average golfer to understand but the differences are as minute as the information that has been given. I would not recommend the graphite shaft to any golfer, even if he could afford it. Besides, not being \$5,882 for steno-graphers, \$6,128 for typists and \$5,432 for file clerks and messengers. Clerks who show ability and interest in becoming fingerprint technicians can receive promotions to \$8,572 annually after a relatively short time.

In addition to the requirement of having a high school diploma, applicants must be at least 16 years old and be a citizen of the United States.

Career Openings In FBI Available

Career positions with the FBI are available for high school graduates. Philip A. McKitt, Special Agent in Charge of the Mobile Field Division has announced.

Needed are persons to fill non-investigative categories such as stenographers, typists, file clerks, messengers, fingerprint technicians and others.

These positions are available both to men and women and there are currently a number of vacancies existing at FBI Headquarters in Washington, D. C.

No experience is necessary for clerical positions, although stenographers and typists must pass examinations.

Annual starting salaries are \$5,882 for stenographers, \$6,128 for typists and \$5,432 for file clerks and messengers. Clerks who show ability and interest in becoming fingerprint technicians can receive promotions to \$8,572 annually after a relatively short time.

In addition to the requirement of having a high school diploma, applicants must be at least 16 years old and be a citizen of the United States.

Weekend Traffic Accident Report

During the weekend period from 6:00 p. m. Friday, May 25, through 12:00 midnight Sunday, the Alabama State Troopers investigated a total of 297 rural traffic accidents with 110 injuries involved and 5 fatalities. The fatalities occurred in these counties, 2 in Calhoun and 1 each in Crenshaw, Russell and Mobile County.

These accidents bring the total lives lost this year in rural Alabama traffic accidents to 333 persons as compared with 318 killed during the same period of time last year.

Troopers of the eight county Dothan District investigated 19 traffic accidents with 21 injuries and no fatalities during the weekend period.

Coffee County troopers investigated 4 accidents this weekend with 9 injuries and no fatalities. So far this year 3 persons have been killed in motor vehicle traffic accidents in this county as compared with 4 killed during the same period last year.

COFFEE
Dr. Roy M. Kottman, Dean of the College of Agriculture at Ohio State University, said, "By the year 2000, Americans will spend only 12.5 percent of their disposable personal income for food, compared with 16 percent today. Higher incomes will permit consumers to continue to choose more animal products." He based his projections on a three-year long-range planning project, "Life 2000," conducted by faculty members in the institutions which he heads.

Dr. Kottman predicted that each U.S. citizen will consume an average of 987 pounds (total weight equivalent) of animal products in the year 2000, compared with an average of 634 pounds in the year 1967. Consumption of beef and pork will increase to 140 pounds per person per year, compared with 115 pounds today, he said, and pork consumption will climb to 75 pounds, 15 percent above present levels, reflecting favorable public reaction to dramatic improvements in pork quality along with more aggressive marketing and promotion of pork products. This means that by the year 2000, U.S. farmers will need to produce 70 percent more beef and pork.

LOANS
Coffee County is developing a number of agriculture-related businesses. This kind of development takes money. There are several banks and other lending institutions in the county which are serving many of the needs of businesses.

C. U. Storey, Specialist in Rural Development, Ozark, told me recently that the Small Business Administration has made some changes in its lending programs which allow them to make more loans of this type. Firms that buy, sell, or process farm supplies or commodities or provide other services are eligible. Those who engage in agricultural production are not eligible for these loans.

For example, loans are available for the purchase and operation of harvesting machinery, warehouses, cold storage plants, and feed mills; the operation of a commercial feedlot; operation of a hatchery for sale of chicks, packaging, freezing, or processing of meats, fish, fruits, and vegetables. These are guaranteed loans of up to \$50,000 with a maximum of \$30,000.

For those of you who might

be interested, you can see a representative of the SBA at the DeLham Chamber of Commerce, the fourth Thursday in each month or you can write directly to the Small Business Administration at 908 South 20th Street, Birmingham.

PUBLIC AFFAIRS CONFERENCE
Coffee County Farm Bureau is sponsoring the Public Affairs Conference for Alabama young people. Several Coffee County young people attending are, from Elba: Alice Brockton, LaVaughn Carpenter, Phillip Morrow, from New Brackton, Martha Rogers, from Enterprise, Jimmy Grice, from Mt. Pleasant, Kenneth Howell, and from Goodman, Mark Don-

GARDENS
A lot of farmers that had quit gardening have started gardens again this year. It seems that along with the mid 40's, even many folks who lived entirely on the farm got tired of plant gardens and stopped. However, in the past year or two, I have seen a renewed interest in gardening. This is true on the farm as well as in the city. For example, the Rev. C. L. Woodward, minister at Green Hill Presbyterian Church in Enterprise, has a small garden in one corner of his back yard. He is proud of it. The spot where he has his garden has never been planted in anything. He has some beautiful tomatoes, corn, beans, squash, okra and a few other vegetables.

LIME PAYS
Clayton Walden, who lives on the Bellwood Road south of Enterprise, has a problem with his corn that we see often. This problem slips up on a lot of farmers unexpectedly. They plant corn and it appears that the fertilizer is not taking effect, they have fertilizer injury, or some other problem. But 9 times out of 10, the problem is low soil pH. This is what happened in Clayton Walden's case. When pH becomes so low that the plants do not respond to fertilizer, very poor yields result. A lot of people have low soil pH that is borderline, and yield

is low and they are not able to pinpoint the problem. This is why soil testing and following recommendations are so important. Will bet that Clayton will keep a close check on the soil pH in the years ahead.

ids are low and they are not able to pinpoint the problem. This is why soil testing and following recommendations are so important. Will bet that Clayton will keep a close check on the soil pH in the years ahead.

By: Richburg, Faulk, & Clark
Soil Conservation Service

An escape slide on Shell's West Delta Platform "D" in the Gulf of Mexico has just been released.

A safe angle of descent from the 65-foot deck, yet steep enough for fast evacuation. It will safely evacuate injured and unconscious personnel, too. At the end is a detachable inflated raft that will carry 24 persons and is equipped with a lifeline to support 26 others," said R. L. Wilson, Shell Offshore Division Safety and Environmental Conservation Manager.

The slide, made of neoprene-coated nylon fabric, is packaged in a fiber glass container mounted on the deck edge. When the slide is needed, it is released by pulling one simple latch. This sets off the inflation system which induces a mixture of nitrogen and air. In 10 to 15 seconds the slide is inflated and deployed," Wilson said.

He said the slides have been deployed in winds up to 35 miles per hour and in seas ranging 8 to 12 feet high. They also are recoverable after deployment. Wilson pointed out that each installed slide is deployed and tested after installation by BFC technicians.

The average height from the surface of the sea to the top deck of oil platforms is 65 feet. However, the BFC system can be adapted for use from decks ranging in height from 45 feet to 70 feet.

"Each slide on Shell's platforms is 95 feet long to permit

"The escape slides are being installed purely as an emergency escape device and serve the same purpose on offshore platforms that they serve on airplanes. Shell is constantly evaluating its safety programs and provides what is necessary to protect the workers," said Wilson.

"The escape slides are being installed purely as an emergency escape device and serve the same purpose on offshore platforms that they serve on airplanes. Shell is constantly evaluating its safety programs and provides what is necessary to protect the workers," said Wilson.

SHOP TODAY, DON'T MISS IT.

CHILD OR ADULT \$4.50 EACH

BIG BEAR OFFERS YOU SIX FLAG TICKETS AT A VERY SPECIAL PRICE. A SAVINGS OF UP TO \$1.45. WITH EVERY \$5.00 PURCHASE YOU MAKE AT BIG BEAR YOU CAN BUY A TICKET FOR ONLY \$1.45. SAVE UP TO \$1.45.

PLEASE BUY YOUR FAIR SHARE!

Big Bear has made an exceptionally large volume of beef purchases to get ready for this sale. However, because the demand will be so high, we ask you to limit your purchases to no more than 5 packages of any one item. In this way, each shopper will get their fair share. So please come to Big Bear, get your favorite beef cuts and enjoy relief from high meat prices.

ALWAYS tenderaged

Some High Quality? Certainly! Big Bear sells only U.S.D.A. Choice Beef... Beef that has been graded by U.S. Department of Agriculture inspectors. There is a difference. Not all beef is good enough to be graded U.S.D.A. Choice. Big Bear never sells the beef that isn't... only the best that makes the grade, every time.

John Collier received First Aid and Swimming Skill Awards and First Aid Merit Badge; Tommy Jernigan, First Aid and Swimming Skill Awards and First Aid Merit Badge; Claude Collier, First Aid and Swimming Skill Awards and First Aid Merit Badge; Will Martin, Swimming Skill Award and First Aid Merit Badge; Clive Collier, Swimming, Environment and Family Living Skill Awards and First Aid Merit Badge; Keith Rott, First Aid and Swimming Skill Awards and First Aid Merit Badge; Gary Wise, First Aid, Camping and Swimming Skill Awards and First Aid Merit Badge.

Public Library Has New Books

The Elba Public Library has received 15 new books from Cross Trails Regional Library, for people who don't see well.

These books are printed in 1/4 inch bold type. At present the library has the Western and Romance series, and an inspirational series will be in soon.

Mrs. Edna Dowling, librarian,

Donald Bowdoin Memorial Award Presented

The 1972-73 Donald Bowdoin Memorial Award was presented to Ronnie Powell on behalf of Mr. and Mrs. Cecil Bowdoin, by L. W. Foley, Principal, Elba High School.

Ronnie is the son of Mr. and Mrs. Roland Powell of Elba. This award is given each year to the Senior athlete who has excelled in all sports, a student with a good attitude toward his fellowman, ranking high in academic achievements, and excelling in leadership ability.

Troy To Award 973 Degrees

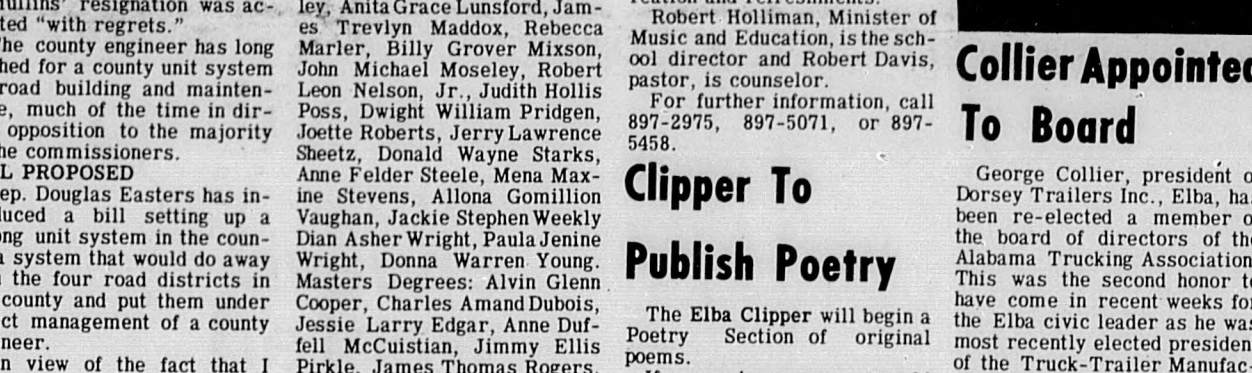

There will be almost 1,000 candidates for degrees at Commencement Exercises at Troy State University on June 8. State Senator Bob Wilson of Jasper will deliver the commencement address.

There are a total of 973 candidates for degrees, including 772 bachelors degree candidates, 182 for masters degrees and 19 for associate degrees.

Degree candidates from our area are:

Bachelors Degrees: Larry Clinton Adams, Robert Floyd Akin, Ronnie Ellis Baker, Linda Mayne Bryant, Daniel Fletcher Carmichael, Jr., Joe Henry Carmichael, Jr., Henry Caylor, Frances Elaine Danford, Leanne Rhoades Davis, Thomas Delice, Richard Warren Dowling, Jr., Robert DeWayne Eveyart, Louis Dell Wans, Louis Rodriguez Fuentes, Jr., Joe William Holley, Jr., Randall Ed Holmes, Jack Langley Hudson, Kathryn Kelley, Anita Grace Lunsford, Janey Mullins, Madeline Rebecca Marler, Billy Grover Mixson, John Michael Moseley, Robert Leon Nelson, Jr., Judith Hollis Potts, Dwight William Prigden, Shette Roberts, Jerry Lawrence Steele, Donald Wayne Starks, Anne Felder Steele, Mena Max Steele, John Lamar Stewart, John Herbert Wright.

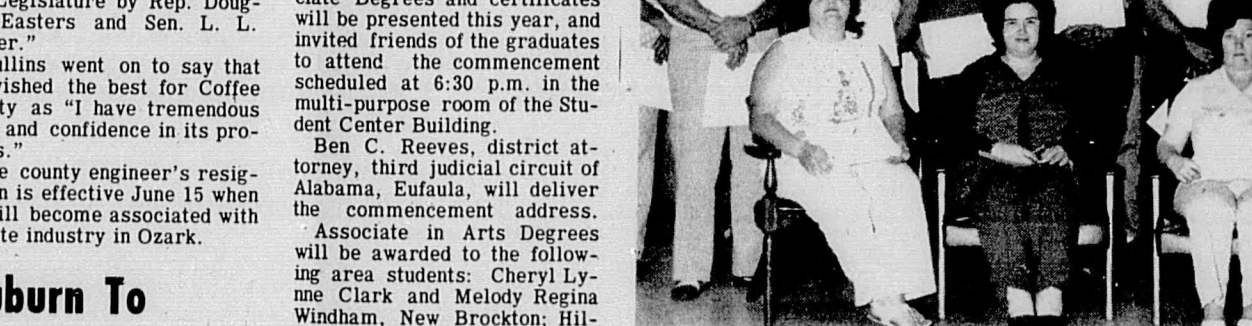

Degrees: Ronald Wayne Curran.

Collier Appointed To Board

George Collier, president of Dorsey Trailers Inc., Elba, has been re-elected a member of the board of directors of the Alabama Trucking Association. This was the second honor to the Elba civic leader as he was most recently elected president of the Truck-Trailer Manufacturers Association.

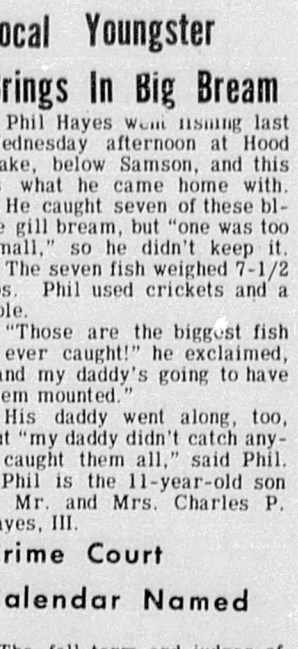

T. K. Dorsey, General Transportation Services, Elba, who is a past president of the Association, also is a member of the board of directors.

Twenty Three Complete Medical Course

Twenty three persons representing eight South Alabama Rescue Squads were awarded certificates last week for completion of the second emergency Medical Training Course at Enterprise State Junior College.

The fifteen - week course, sponsored by the Coffee County Emergency Medical Services Council, provided 81 hours of study as required for emergency technicians in Alabama and was funded by the Council for Comprehensive Area-wide Planning Health Care in the Wiregrass area. (CAPWA), a cooperative health care agency of the University of Alabama at Birmingham and the State Health Department.

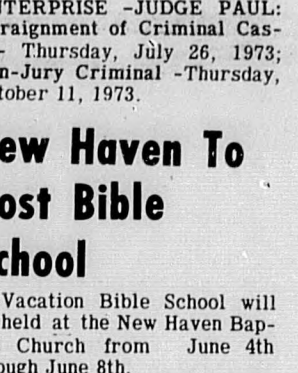

Local Youngster Brings In Big Bream

Phil Hayes was fishing last Wednesday afternoon at Hood Lake, below Samson, and this is what he came home with. He caught seven of these bluegill bream, but "one was too small," so he didn't keep it. The seven fish weighed 7-1/2 lbs. Phil used crickets and a pole.

These are the biggest fish I ever caught," he exclaimed, "and my daddy's going to have them mounted."

His daddy went along, too, but "my daddy didn't catch any," he said. Phil is the 11-year-old son of Mr. and Mrs. Charles P. Hayes, III.

Calendar Named

The fall term and judges of the 12th Judicial Crime Court for Pike and Coffee Counties are as follows:

PAINTING TIP
I'd like to share this painting tip with you. Mrs. Barbara Baugh, a friend of mine, told me how to keep from washing a paint roller every time you finished painting. Barbara said she would wrap her paint roller in clear plastic wrap. Wrapped this way, the roller would keep several hours or overnight.

CHROME CLEANSER
Bathroom fixtures seem to always be hard to keep clean. Rubbing alcohol makes a good cleanser. It cuts sediment from chrome rims, as well as soap dishes. Chrome is left shining.

FLOWER GARDENS
One of the questions asked most often by home gardeners is "What can I grow in the shade?" Most annual flowers grow

from seed prefer full sun, but there is a small group which will tolerate light shade, and a smaller group which even prefers shade. Coleus, foxgloves, nicotiana, French marigolds, pansies, violas, vinca, petunias and ageratum all will tolerate light shade. By far, the best two kinds of flowers for shaded areas are the small-flowered fibrous-rooted begonias and impatiens.

LAWN FURNITURE
Homemakers should clean lawn furniture that has been stored all winter, before the family is ready to use it. The following suggestions will make the job easier.

First Aid Fast Is What Counts

Keep those first aid supplies close at hand . . . help keep small injuries under control. Your pharmacist has them all. Stop in.

Elba Drug Co.

WHY NOT SPEND PART OF YOUR SUMMER AT ENTERPRISE STATE?

YOU'LL FIND: A FULL QUARTER DAY PROGRAM
TWO HALF-QUARTER "MINI-SESSIONS" IN DAY PROGRAM,
25 COLLEGE COURSES AT NIGHT

ENTRANCE REQUIREMENTS: A high school diploma or GED. EARN A TWO-YEAR DEGREE AT NIGHT OR DAY

CHECK ESJC BEFORE YOU ENROLL ANYWHERE

or earthenware so that electronic waves can pass through. If you buy a microwave oven, you have to follow the manufacturer's instruction manual exactly to have satisfactory results.

A microwave oven shouldn't be operated when it's empty. And it is a good practice to stay at least an arm's length from the front of the oven when it's in operation.

Microwave ovens are easy to clean and should be cleaned after each use. Just wipe with a damp cloth. If stubborn stains exist, set a cup of water inside and operate the oven for a few seconds, then wipe clean. You can use a mild detergent for cleaning the oven, but never use scouring pads or abrasive cleaners.

LAWN FURNITURE
Homemakers should clean lawn furniture that has been stored all winter, before the family is ready to use it. The following suggestions will make the job easier.

First, set a few pairs of sturdy water up and hand out scrub brushes and sponges to family volunteers. Whether wrought iron, steel mesh, aluminum, wood, plastic, canvas or duck, most outdoor furniture surfaces are easy to wash. Rinse with the spray from a garden hose and wipe dry with clean clothes or let furniture dry in the sun. Steel wool removes rust from wrought iron furniture. But follow the treatment with metal primer and touch-up paint. Redwood lasts longer if scrubbed and sanded each season, and painted with sealers.

The padding on outdoor furniture is usually covered with plastic-coated fabric or vinyl. You can clean padding easily with a sudsy sponge. If the covers are really worn looking, but the padding is still sturdy, you can easily make washable slipcovers at home.

Several important rationing facts were called to the attention of Alabama consumers the week of the week by District OPA officials. We suggest that you clip the following guide and keep it for ready reference.

MEAT AND FATS - Red Stamps lettered I became valid for these foods May 23. All red stamps lettered E, F, G, H, and J expire May 31. Stamps lettered K will become valid next Sunday, May 30, and will remain good through June. Other "June" red stamps will become valid as follows: L, June 6; M, June 13; N, June 20.

CANNED FRUITS AND VEGETABLES - The Blue Stamps G, H and J, instead of expiring on May 31, have had their validity extended to June 7. The next set of blue stamps - K, L and M - became valid for buying canned and processed foods on Monday, May 24, and thus may be used along with the G-H-J set through June 7. The K, L, and M stamps remain good until July 7.

SUGAR - Stamp No. 15 and No. 16 in Ration Book 1 became valid for 5 pounds of sugar each, for use in home canning, beginning May 24. If more sugar than the 10 pounds made available through these stamps is required, housewives may apply for additional allotments at their local ration boards.

COFFEE - Stamp No. 23, valid for one pound of coffee, expires next Sunday, May 30. **SUGAR** - Stamp No. 12, valid for five pounds of sugar, expires May 31. The next stamp No. 13 will be good for five pounds from June 1 through August 15.

SHOES - Stamp No. 17, good for a pair of shoes through June 15. Stamp No. 18, valid for shoes as of June 16. No announcement made concerning how long No. 19 will be valid.

GASOLINE - No. 6 coupons in "A" Books good for 4 gallons each through July 21. **MISCELLANY** - Applications for Ration Book 3 now being distributed in Alabama. They may be filled out immediately, but are not to be stamped and mailed to the OPA Center in Birmingham before June 1. The mail-in period for the application is from June 1 through midnight June 10. Persons who do not already have applications may obtain them from the postoffice after June 1.

Members of the armed services on leave or furlough now eligible for up to five gallons of gasoline for "personal" driving. They apply by taking their leave papers to local ration boards.

DICK JAMES, FAST DIVISION SALES MANAGER SAUNDERS LEASING SYSTEM INC.

Saunders Names Dick James Fast Division Sales Manager

Richard E. James, Jr., has been named Sales Manager of the FAST Division of Saunders Leasing Company. FAST is located in the Birmingham, Alabama headquarters of Saunders. FAST offers fuel stop and tax reporting services both to Saunders lease customers, and to other companies operating tractor-trailers or trucks. In less than four years of operation as an independent division of Saunders, FAST has achieved rapid growth. James holds a 1946 BS degree in industry from the University of Alabama in Tuscaloosa, and he is a member of the Society of Automotive Engineers. A native of Elba, Alabama, he resides with his wife in Birmingham. He is the father of two sons.

New Federal Regulation On Life Saving Devices

Conservation Commissioner Claude D. Kelley reminded Alabama boaters Tuesday that a new Federal regulation will require that, effective October 1, 1973, there must be, on board recreational boats 16 feet or more in length, one Type 1, 2 or 3 Coast Guard approved life saving device for each person aboard. In addition there must be one throwable Class 4 device on each boat. Type 2 - This device is the same capabilities as a Type 1 device except that it has a buoyancy of at least 15-1/2 pounds. This device is acceptable for all size boats. Type 3 - This device is designed to keep a conscious person afloat in a vertical or slightly backward position and allow for such activities as water skiing. This type is acceptable for all size boats. Type 4 - This is an approved device designed to be thrown to a person in the water and not worn. It's designed to have at least 16.5 pounds of buoyancy. Acceptable for vessels under 16 feet long and as a throwable device for vessels more than 16 feet long.

Federated Women's Clubs Of Elba Host Convention

Federated Women's Clubs of Elba were hostesses to the Federated Women's Clubs of Alabama at the State Convention in Enterprise recently.

Shown here at the Prayer Breakfast are: Mrs. E. M. Warr, Price Ringo, Mrs. Oscar Vau-ghan and Mrs. Doris Cooper. Miss Jeanette Garrett, Mrs.

Miss Adkinson Honored With Morning Party

Mrs. Wayne Marler and Mrs. Lewis Pearce entertained Miss Donna Adkinson and other senior girls at a morning cove party in the home of Mrs. Pearce.

Refreshments were served assisted by Misses Vonda Marler and Mitzi Marler. Small personalized megaphones and pom poms made up in the class

SPORTS

with JOHNNY MARTIN

How about the new revolution in the line of golf equipment, the graphite shaft? You don't hear many conversations among golfers anywhere these days that aren't at least partly about the new shaft. Does it work? If so, will it work for the average golfer as well as the duffer? Is it lighter, heavier, or the same weight as the steel shaft? Is it cheaper or more expensive? Are the pros using it? All these questions come up at some time or another in pro shops everywhere.

Answering first questions first, the graphite shaft definitely adds distance to the distance club, those being woods and long irons. I swung one on the practice tee recently, and was very impressed with the feel of the club. It seems that the feel (or coordination) between the hands and the clubhead is the same as with the steel shaft, even though the club seems to flex more on the downward arc, which is the main factor as far as distance is concerned. Putting the answer to the distance

question more simply, yes, the ball flies farther with the graphite shaft.

Would the average golfer benefit from the new shaft? The opinion here is definitely not. The average golfer is not usually a distance player, and control is usually a big problem in encounters. The added flex may add distance to his drives, but may also cause him to spray the ball.

Now the question may arise "Isn't a regular shaft the same, flex, no matter what the material. One swing with the graphite club proves that false. It is supposed to be, but it's not, for this reason. A flex machine which is used to check shafts, does not use the heavy jerky method of movement that the average golfer does, and doesn't bend the club as a golf swing does.

Weight difference in the graphite and conventional steel is not a big one. The overall weight of a standard driver is not changed by a graphite shaft. It may feel heavier

or lighter and even look it, but it's not on the scales. Now for the big difference in graphite and steel, the price. The cost to make a club with a graphite shaft is roughly five times greater than that of making a steel shaft club. The pros on the tour are using them but mostly in drivers only. A graphite driver costs approximately eighty-five dollars, and it's easy to figure why more pros don't use them.

Now I hope this information hasn't been passed along in too complicated a manner for the average golfer to understand, but the differences are as minute as the information that has been given. I would not recommend the graphite shaft to any golfer, even if he could afford it. Besides, not being practical, the new idea is not all that revolutionary. All in all, the added length is outweighed by all the other problems it may cause in your golf games as well as your billfold.

Career Openings In FBI Available

Career positions with the FBI are available for high school graduates. Philip A. McEliff, Special Agent in Charge of the Mobile Field Division has announced.

Needed are persons to fill non-investigative categories such as stenographers, typists, file clerks, messengers, fingerprint technicians and others. These positions are available both to men and women and there are currently a number of vacancies existing at FBI Headquarters in Washington, D. C.

No experience is necessary for clerical positions, although typists and stenographers must pass examinations. Annual starting salaries are \$6,882 for stenographers, \$5,128 for typists and \$5,432 for file clerks and messengers. Clerks who show ability and interest in becoming fingerprint technicians can receive promotions to \$8,572 annually after a relatively short time.

In addition to the requirement of having a high school diploma, applicants must be at least 16 years old and be a citizen of the United States.

Weekend Traffic Accident Report

During the weekend period from 6:00 p. m. Friday, May 25, through 12:00 midnight Sunday the Alabama State Troopers investigated a total of 207 rural traffic accidents with 110 injuries involved and 5 fatalities. The fatalities occurred in these counties, 2 in Calhoun and 1 each in Crenshaw, Russell and Mobile County.

These accidents bring the total lives lost this year in rural Alabama traffic accidents to 353 persons as compared with 318 killed during the same period of time last year.

Troopers of the eight county Dothan District investigated 19 traffic accidents with 21 injuries and no fatalities during the weekend period.

Coffee County troopers investigated 4 accidents this weekend with 9 injuries and no fatalities. So far this year 3 persons have been killed in motor vehicle traffic accidents in this county as compared with 4 killed during the same period last year.

A plaque and a check were presented to Mr. Johnson in appreciation for his service to trade and industrial education for the State of Alabama.

Mrs. Smith Initiated At AU

Janice W. Smith has just been initiated into Phi Kappa Phi, honorary society, at Auburn University. She is one of 15 graduate students and 73 undergraduates to be recognized for the top honorary society in the nation's land grant institutions. Students elected must be in the top five percent of their class.

Mrs. Smith is the daughter of Mr. and Mrs. David W. Windham of Elba. She majored in Pharmacy and will receive the BS degree in commencement exercises at Auburn June 5.

Reception Honors Industrial Education Head

A reception was held recently in the Home Economics Building at Elba High School for Mr. Spencer Johnson, retiring State Supervisor of the Southeast District of Trade and Industrial Education of the Alabama State Department of Education.

Mr. Johnson has completed 35 years service in that field. The reception was hosted by District and State VICA officers from the Southeast District. Charles Jacobs, president, Elmer Taylor, Superintendent of Elba City Schools, presented the welcome, and R. D. Messick directed appreciation to coordinators: Day Trade Instructor, Hobson Walden; State Local Director, Jim Wysocki; and State staff members, Hubert Worthy, D. T. Dilworth, and J. C. Lindsey.

Chandler-Bailey To Wed In August

The engagement of Miss Deborah Sue Chandler to Jimmy Albert Bailey is announced by her parents, Mr. and Mrs. Dykes Chandler of Montgomery. The future groom is the son of Mr. and Mrs. J. O. Bailey of Elba.

Miss Chandler is the granddaughter of Mr. and Mrs. Cotton Pearce of Elba and Mr. and Mrs. Denver Chandler of Montgomery. She is a graduate of

Williams Private School in Montgomery.

Mr. Bailey is the grandson of the late Mr. and Mrs. Jesse Whitman and the late Mr. and Mrs. Claude Bailey, all of Elba. He is a graduate of Elba High School.

The wedding has been planned for Saturday, August 4th in the First Baptist Church of Elba. All friends and relatives are invited to attend.

Relatives

Every family has one... The Estimator... knows to the penny how much you paid for your things - free estimates given.

Mrs. Clean... dust inspector - usually a mother-in-law Uncle Lush... if there's anything in the house that gurdies - he'll find it.

The Big Dealer... after you bought something, he always knows where you could have gotten a better one at half the price.

The Summer time... the events the students practiced in were the fifty yard dash, the standing long jump, softball, throw, 300 yd. dash, high jump, and 880 yd. run.

She's constantly getting "Stuck in the Middle" of discussion of peoples' "Hot pants." But "Power to the People" since everybody has his own thing to worry about and not everybody else's.

The halls at EHS are now full of little "Hummingbirds" since school is just about out for the summer. Many students will "Driftaway" and "Clime Your Eyes" 'til next year's school term. During the summer we hope our EHS will "Rest in Peace" cause next year it could be torn apart by Seniors of '74. So long for the summer. (This story should have been "Sealed With Kisses," who knows?)

REMINISCING

As the 1972-73 school year draws to a close, our mind and eyes begin to overflow with memories of the past year. Especially for the Senior Class of 1973, this year will be one that shall linger in their minds eternally. The laughter, tears, sorrow, joy and happiness all combined to make up one heck of a year.

The year began with the registering for a new school term. From that day forward many new friends and companionships have existed. The very first weeks of school were climaxed with the hustle of a change, the headaches coming with the first days of Mack King and most of all the sweetness of victory in our first ballgame. The sweet victories kept rolling in as we kept throwing the ball. Steve kept running it, Jimmie kept punting it, Barry kept intercepting it, Jeff kept recovering it. Don kept making the extra points, Willie kept blocking and the Tigers kept winning.

Of course there were many more responsible for victories, like Mark Martin, Heath Keith, Dennis, Leon, David, Ronnie, David, Tootsie, Clifford, Horrie, Clinton and Willie found a streak of winning. This was the best basketball team EHS had seen in a long time. They sure gave us a lot of excitement, led by Albert T., who just kept racking up the points, (making him a number 1 hero to many, specially the girls).

Coach Sawyer, you really had one heck of a team. Then the Miss Elba contest was held as girls representing each senior high homecoming competed to become Elba Beauty. The title was won by Miss Delia Smith and blonde-brown-eyed freshman. EHS beauty was truly shown in the happy smiling face of Delia.

The Christmas holidays brought break-ups, make-ups, rings, vows and cars. Returning from the holidays meant semester exams and headaches. Well, one semester down and one to go.

The winter passed with the same old happenings - gripping from Democracy, Sociology, and Speech classes (I wonder why), Miss Evans giving zeros, flunking algebra and chemistry, sleeping in grammar, draining brains in English lit with all its extra work (lay some Macbeth on us Heath). But the boredom broke! Snow, snow, and more snow! Snowmen, snow balls, snow fights, a white Valentine, that's what one week-end was. That's one week-end of Elbians for many years.

Happy times and hard work were once again in store for the Marching Tigers as they prepared to journey to Pensacola for the Florida State Contest for 1973-74. That night contest was once again proved beneficial as our fantastic band found excellent and superior ratings in the Sunshine State. (Keep on shorty, and our band may be the title of "The Elba Million Dollar Band"). They already sound that way to us.

ACT Test for Juniors, graduation invitations for Seniors and coming home a date.

The prom began to reveal the year is slowly coming to a close. The Jr.-Sr. Prom, the event of the year for the Juniors and Seniors, proved to be a great success. The raising of the ceiling, the worry over the walls, the driving of feet, the excitement of the night, the excitement of the night, the excitement of the night.

AEA Holidays at last! Fill up the cars, grab a towel and head for the beach.

Serving Coffee, Lunch, and Confectionery

COFFEE

BY TOM CASADAY, COUNTY EXTENSION CHAIRMAN

MORE MEAT
Dr. Roy M. Kottman, Dean of the College of Agriculture at Ohio State University, said, "By the year 2000, Americans will spend only 12.5 percent of their disposable personal income for food, compared with 16 percent today. Higher incomes will permit consumers to continue to choose more animal products."

Coffee County Farm Bureau is sponsoring the Public Affairs Conference for Alabama young people. Several Coffee County young men and women will be attending. The conference will be held at Shocco Springs in Talladega County June 11, 12 and 13.

This program for young people is designed to give youth an opportunity to discuss a number of issues that confront us. Coffee County young people attending are from Elba: Alice Brinson, LaVaughn Carpenter, Philip Morrow, from New Brock: Martha Rogers, from Enterprise: Jimmy Grice, from Mt. Pleasant: Kenneth Howell, and from Goodman: Mark Gudimov.

GARDENS
A lot of farmers that had quit gardening have started gardens again this year. It seems that along about the mid 60's, even many folks who lived entirely on the farm got tired of planting gardens and stopped. However, in the past year or two, I have seen a renewed interest in gardening. This is true on farms as well as in the city. For example, the Rev. L. E. Woodward, minister at Green Hill Presbyterian Church in Enterprise, has a small garden in one corner of his back yard. He is proud of it. The spot where he has his garden has never been planted in anything. He has some beautiful tomatoes, corn, beans, squash, okra and a few other vegetables.

Clayton Walden, who lives on the Bellwood Road south of Enterprise, has a problem with his corn that we see often. This problem slips up on a lot of farmers unexpectedly. They plant corn and it appears that the fertilizer is not taking effect, they have fertilizer injury, or some other problem. But 9 times out of 10, the problem is low soil pH. This is what happened in Clayton Walden's case.

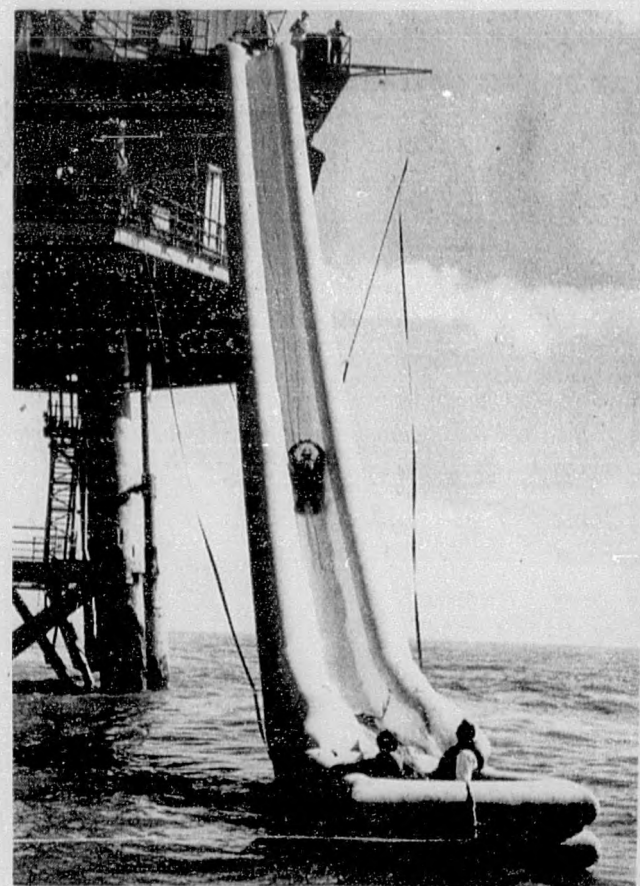

When pH becomes so low that the plants do not respond to fertilizer, very poor yields result. A lot of people have low soil pH that is borderline, and yields are low and they are not able to pinpoint the problem. This is why soil testing, and the following recommendations are so important. I will bet that Clayton will keep a close check on the soil pH in the years ahead.

An escape slide on Shell's West Delta Platform "D" in the Gulf of Mexico has just been released.

Currently, the fastest way to evacuate an offshore oil platform in an emergency is down an escape slide, as demonstrated by a crewman of Shell Oil Company's West Delta B platform who can hold on to the lifelines.

Inflatable Escape Slides Now On Offshore Oil Rigs

The first installations of inflatable escape slides on offshore oil platforms were made on the West Delta B platform in the Gulf of Mexico off the Louisiana coast. The slides are back-up evacuation systems that can safely evacuate the average crew of 20 to 30 men from a platform in less than a minute. The primary evacuation routes from offshore platforms are two sets of stairs that lead to the water. The offshore oil platform slides were adapted from those originally developed by the B.F. Goodrich Company for emergency escapes from the 747 airplane.

The primary evacuation routes from offshore platforms are two sets of stairs that lead to the water. The offshore oil platform slides were adapted from those originally developed by the B.F. Goodrich Company for emergency escapes from the 747 airplane.

The slides are back-up evacuation systems that can safely evacuate the average crew of 20 to 30 men from a platform in less than a minute. The primary evacuation routes from offshore platforms are two sets of stairs that lead to the water. The offshore oil platform slides were adapted from those originally developed by the B.F. The escape slides are being installed purely as an emergency escape device and serve the same purpose on offshore platforms that they serve on airplanes. Shell is constantly evaluating its safety programs and provides what is necessary to protect the workers," said Wilson.

HOUSEHOLD HINTS

Select fresh, tender vegetables. They have more vitamins and minerals than those that have been in storage or on display. An easy way to remove a wax seal from jelly or jam glasses is to stick an ice pick in the center of the seal and lift it from the glass in one piece. Save the trays that meat comes in and use them as throw away dishes to feed family pets. Paper filters used for coffee pots are excellent for straining soup and broth.

The use of recommended vegetable varieties will go a long way in avoiding some major garden diseases.

The rapidly growing food service industry is expected to reach annual sales of \$80 billion in 1980, up from the current \$44 billion.

Marion Sanders of Coffee County, State President of the Alabama Association of Soil and Water Conservation Districts, informs me that the theme for this year's observance is "Changing Challenges".

As the population of the world increases, there is a greater demand for food, lumber, and all the other necessities of life. To provide these things, we must utilize our resources of land, water, air, etc. As stewards, we must utilize these resources in an optimum manner. We must use what is needed to meet our needs, but we must conserve and not abuse the remainder. The Coffee County Soil and Water Conservation District, and some 3,000 companion districts, throughout the nation, through their State and National Associations, are sponsoring this event for the 19th consecutive year.

Soil Stewardship Week Proclaimed By Governor

Governor George C. Wallace has proclaimed May 27-June 3 as Soil Stewardship Week in Alabama. This will be a part of a nationwide observance, that places emphasis on man's obligation to be as stewards of soil, water, and other related resources.
